**Subject:** WLL Ford Property

Debbie,

I hope you and Ben had a good trip to St. Louis and back. I believe the meeting was worthwhile.

We had spoken about the Ford / Crossroads property and some radioactive materials that have leaked from Area 2 onto it that are still there today. At that time, I believe I committed to sending the information I have on to you and Sarah.

Sarah,

One of our constituents has some recent photos showing that the radioactive material that seeped onto the Ford Property years ago has not been remediated and is still there. I will forward these as soon as I receive them.

I expect to have them later today or sometime tomorrow.

In the meantime, I have attached the documentation I received along with a narrative of my conversation with Paul Rosasco at a recent CAG Technical Committee meeting confirming this.

Your assistance in this matter is appreciated,

Harvey
